

Turnover in service industries

2021, November

Preliminary data: Turnover in services grew in November

According to Statistics Finland's preliminary data, the working day adjusted turnover in service industries grew by 13.9 per cent in November 2021 compared with November 2020. The development was partly due to the exceptional situation caused by the coronavirus one year earlier. Services are here examined exclusive of trade.

Turnover grew from the previous month

According to the preliminary data the seasonally adjusted turnover in service industries grew in November 2021 by 1.3 per cent compared to October. In October, seasonally adjusted turnover grew by 1.5 per cent, while in September, turnover was 1.4 per cent higher than in the month before.

Change in seasonally adjusted turnover from the previous month of service industries, %

The data for the latest month are preliminary and are released at a delay of around four weeks. The data may become significantly revised in coming months.

The factors caused by the variation in the number of weekdays are taken into account in adjustment for working days. This means taking into consideration the lengths of months, different weekdays and holidays. In addition, seasonal variation is eliminated from seasonally adjusted series, on account of which it makes sense to compare observations of two successive months as well.
